Some Questions to Consider in Choosing Your STEM Partnership:

- **WHY**: What learning outcomes are possible for my students through partnership that would not be possible without partnership?

- **WHAT**: What are my learning outcomes, i.e. application of STEM concepts, practice of communication with lay audiences, awareness of current issues? What is my “ideal” service project? Will I consider both direct and indirect projects?

- **WHO**: Who has the relationships? What kinds of support will I need to connect with partners? What time can I invest?

- **WHEN**: How does my course timeline fit with the community’s timeline
  - Schools: Idaho Standardized Test/Class Schedule
  - Environmental Projects: Planting Schedule

- **HOW**: What are some resources I might need?
